

Phenomenology Workshop

Monday, July 14, 2014
10:00 a.m. – 2:00 p.m.
OLLI
4215 Arts Village Dr.
Sedona AZ, 86336

Have you ever noticed that sometimes our experiences are different from what we know to be true? For example, we say, "the sun rises and sets," while we know the earth is actually rotating. **Phenomenology** is a branch of philosophy that investigates the way human beings experience phenomena in the world.

Specially crafted exercises will give you an opportunity to look, perhaps for the first time, at the way you are experiencing things. It is sure to be both surprising and delightful. You will also have an opportunity to share and compare your experiences with others.

Admission: \$20

At this workshop you will gain insight into four categories that shape our everyday lives:

- **Space** – Do we ever experience space alone, or do we merely experience objects in space?
- **Time** – What does it mean when we say "time drags" or "time flies?" How does our experience affect the way we perceive time?
- **Memory and the Future** – How is a memory similar or different from anticipating a future event?

"The core of philosophy ...lies in the perpetual beginning of reflection, at the point where **an individual life begins to reflect on itself.**"

Maurice Merleau-Ponty
